Summary

Android developer building production apps with **Kotlin and Jetpack Compose**, with experience in Flutter, machine learning, and integrating LLMs into mobile apps. Focused on reliable, well-architected applications and challenging engineering problems.

Experience

Junior Software Engineer (Android) – *MyMedicalHub International* Jan 2026 – Present

- Develop and maintain production Android apps in **Kotlin and Jetpack Compose** for AI-assisted healthcare, rehabilitation and athletic assessment: **EMMA Health**, **Atlas Athlete** and **AI Guided Therapy (MyBackHub)**.
- Integrated **Android Health Connect** to read health and activity data from wearable devices, bringing it into the app's assessment and progress features.
- Build musculoskeletal assessment, movement analysis, posture tracking, rehabilitation and exercise-guidance features with AI-assisted feedback.
- Implement UI components, API integrations and media handling, working with backend, QA and product teams to test, debug and ship features.

Junior Flutter Developer – *ScaleBridger* Mar – May 2025

- Developed production Flutter apps integrated with Firebase, using Clean Architecture with Cubit/Bloc.

Projects

- **StudyBuddy AI – Photo-to-Answer Study Assistant** GitHub
  Kotlin, Jetpack Compose, Clean Architecture (MVVM), Koin, Ktor, CameraX, ML Kit, Room, Gemini API
  Android app that turns a photo of a textbook question into a short, exam-style answer. A vision LLM reads Bangla, math and diagrams with on-device OCR fallback; includes automatic model fallback, follow-up answers, saved answers and Keystore-encrypted API keys.
- **Limiter – App Usage Control** GitHub
  Kotlin, Jetpack Compose, Coroutines, UsageStatsManager, Accessibility Service
  Digital wellbeing app that tracks usage, enforces daily limits and blocks restricted apps through real-time foreground-app monitoring.
- **Smart Queue – Appointment & Queue Management System** GitHub
  C#, ASP.NET Core, Entity Framework Core, SQLite, React
  Full-stack system with a REST API and React dashboard for booking, live queue status and call-next/complete/cancel workflows.
- **E-commerce Platform** User App — Admin Panel
  Flutter, Firebase, Stripe API – Shopping app with real-time updates and Stripe payments, plus an admin panel for products and orders.
- **VoiceBridge – Autism Support App** GitHub
  Flutter, MVVM, Firebase, GetX – Educational app with gamified learning, emotion recognition and progress tracking.

Education

University of Rajshahi – B.Sc. in Computer Science & Engineering 2020 – 2025 — CGPA: 3.52
Thesis: Integrating CBAM and CLAHE in RetinaNet for Enhanced Remote Sensing Object Detection, achieving **93.47% mAP@0.5** on the RSOD dataset.

Skills

Languages: Kotlin, Dart, Java, C, C++, Python, C#
Mobile: Jetpack Compose, Coroutines/Flow, Koin, Ktor, Room, CameraX, ML Kit, Flutter, Bloc/Cubit, GetX, Provider
Architecture: Clean Architecture, MVVM, REST APIs
Backend & Web: Firebase (Auth, Firestore, Cloud Functions), ASP.NET Core, Entity Framework Core, Laravel, React, Stripe API
AI & ML: TensorFlow, Keras, PyTorch, LLM APIs (Gemini, OpenRouter)
Databases & Tools: MySQL, SQLite, Git, GitHub, Azure DevOps, Postman

Awards

2nd Runner Up, Flutter Stack – **Learnathon 3.0** (completed its 4-month Flutter training program).
